on

ARTIFICIAL INTELLIGENCE

08-08-2022 to 09-08-2022

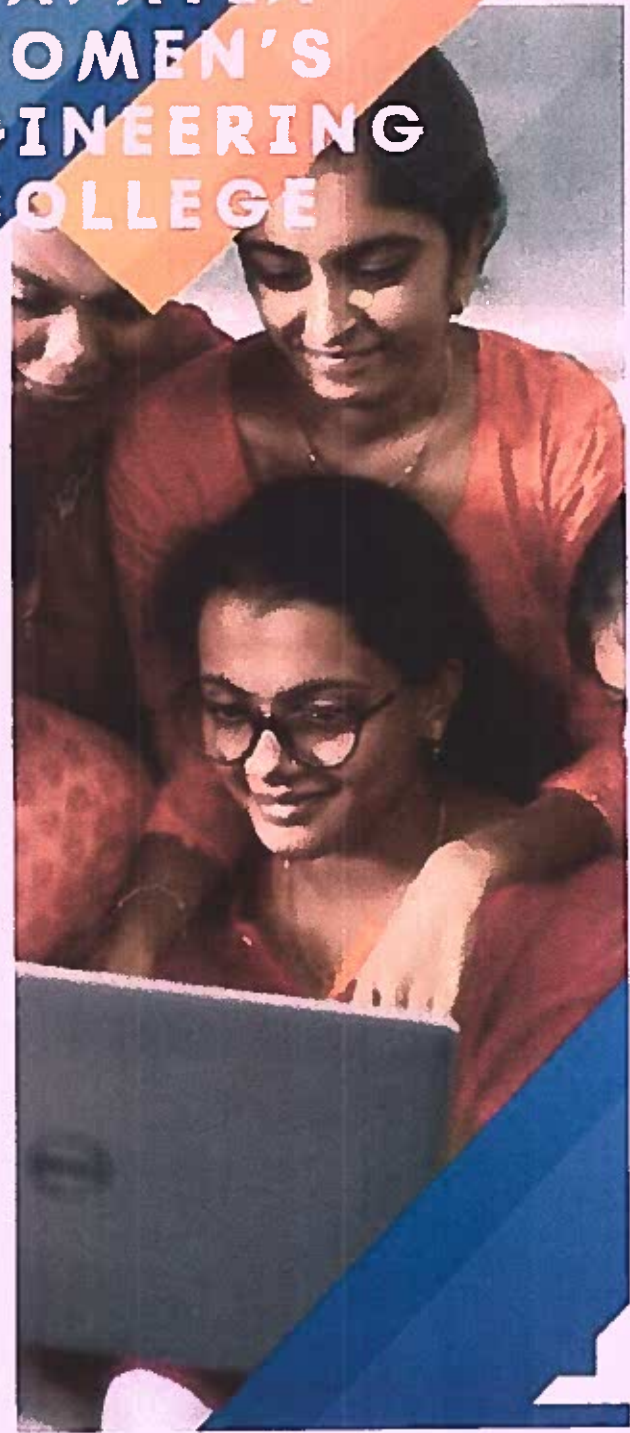

Artificial Intelligence (AI) refers to the development of computer systems that can perform tasks that typically require human intelligence. These tasks include learning, reasoning, problem-solving, perception, language understanding, and decision-making. AI technologies aim to simulate and replicate human cognitive functions to automate complex processes and enhance efficiency across various domains. By the end of the sessions, they were likely equipped with valuable knowledge and insights into AI, which would be beneficial for their future career prospects.

INTERNET OF THINGS

The Internet of Things (IoT) refers to the network of interconnected physical devices, vehicles, buildings, and other objects embedded with sensors, actuators, software, and network connectivity. These devices collect and exchange data, creating an ecosystem where the physical world is integrated with the digital world. The primary goal of IoT is to enable these devices to communicate, share information, and make intelligent decisions, often without direct human intervention. By the end of the sessions, they were likely equipped with valuable knowledge and insights into IoT, which would be beneficial for their future career prospects.

A TWO DAY SKILL ENHANCEMENT PROGRAM ON

CYBER SECURITY

18-03-2021 & 19-03-2021

Cyber Security, is a broad field dedicated to protecting computer systems, networks, and data from unauthorized access, attacks, damage, or theft. As our reliance on digital technologies continues to grow, Cyber Security has become a critical aspect of ensuring the confidentiality, integrity, and availability of information. By the end of the sessions, they were likely equipped with valuable knowledge and insights into AI, which would be beneficial for their future career prospects.

BAPATLA WOMEN'S ENGINEERING COLLEGE

A TWO DAY SKILL ENHANCEMENT PROGRAM

ON BIG DATA ANALYTICS

24-01-2020 & 25-01-2020

Big Data Analytics refers to the process of examining and uncovering patterns, trends, associations, and insights from large and complex sets of data. The term "big data" is used to describe datasets that are so large and diverse that traditional data processing tools and methods are inadequate to handle them effectively. Big Data Analytics involves using advanced techniques and technologies to extract valuable information and knowledge from these massive datasets.

A TWO DAY
SKILL ENHANCEMENT
PROGRAM
ON
CLOUD COMPUTING

24-07-2018 & 25-07-2018

Cloud Computing is a technology paradigm that involves delivering computing services, including storage, processing power, databases, networking, software, analytics, and intelligence, over the internet (the cloud) to offer faster innovation, flexible resources, and economies of scale. Instead of organizations owning and maintaining physical servers and data centres, they can access and utilize computing resources on a pay-as-you-go basis from cloud service providers. By the end of the sessions, they were likely equipped with valuable knowledge and insights into AI, which would be beneficial for their future career prospects.

Dated: 27.07.2018

PROGRAMME REPORT

Name of the Program : A two day Skill Enhancement Program on 'Cloud Computing'

No.of Students Enrolled : 90

Dates : 24.07.2018 to 25.07.2018

Timings : 9:30AM to 12:30PM & 1:30PM to 4PM

Resource Person Details : Mrs. T. Sai Lakshmi

Lecturer, Department of C.S.E.

Bapatla College Of Arts & Science,

Srinivas Nagar, Bapatla, Andhra Pradesh.

Email:lakkakulasrilatha@gmail.com

Mobile #: +91-9912025065

A two days program conducted on "Cloud Computing" from 24.07.2018 to 25.07.2018 and students of II/IV, III/IV & IV/IV B. Tech have attended the training programme and benefited well. During the program, the resource speaker discussed the fundamentals of 'Cloud Computing' and its significance in the competitive world. Cloud Computing is a technology paradigm that involves delivering computing services, including storage, processing power, databases, networking, software, analytics, and intelligence, over the internet (the cloud) to offer faster innovation, flexible resources, and economies of scale. Instead of organizations owning and maintaining physical servers and data centres, they can access and utilize computing resources on a pay-as-you-go basis from cloud service providers. By the end of the sessions, they were likely equipped with valuable knowledge and insights into AI, which would be beneficial for their future career prospects. The Management, Principal, TPO expressed their gratitude to the trainer.
