

(ESTD. 2009)

Bapatla Women's Engineering College

BAPATLA - 522 101, Guntur (Dist), A.P.

(Sponsored by The Bapatla Education Society)

Approved by AICTE-New Delhi, Affiliated to Acharya Nagarjuna University

An ISO 9001 : 2015 Certified Institution

POLICY ON ENERGY UTILIZATION & ENVIRONMENT

Bapatla Women's Engineering college environment and energy utilization policy aim to manage its energy usage in a systematic manner to reduce its environmental impact. This energy and environment policy is mandatory for all components of the institution and applies to the various activities undertaken by the institution. This policy will help us to incorporate efficiency and environmental awareness into our daily activities, helping us to realize our responsibility and dedication to conserve natural resources and to reduce their use. The college regularly engages in green literacy programs to reduce energy consumption and protect the environment.

Objectives:-

- To encourage the students to keep the environment clean and green.
- To educate the students to create awareness among public.
- To activate power management features on your computer and monitor so that it will go into a low power sleep mode when you are not working on it. whenever possible shutdown rather than logging off.
- To reduce local air pollution emissions using environment-friendly vehicles, including bicycles, public transportation and use of pedestrian-friendly roads.
- To turn off unnecessary lights in conference rooms, class rooms, lecture halls when they are not in use and use daylight instead.
- To use LED or compact fluorescent bulbs as much as possible.
- To use the fans only when they are needed.
- To under taken tree plantation drive.
- To encourage everyone in the campus to minimize energy consumption, atmospheric emission and noise.

Promotion of "Save Energy Tips" in and outside the Institute:

- Activate power management features on your computer and monitor so that it will go into a low power "sleep" mode when you are not working on it.
- Turn off your monitor when you leave your place.
- Whenever possible, shut down computer rather than logging off.
- Turn off unnecessary lights in conference rooms, classrooms, lecture halls when they are not in use and use daylight instead.
- Avoid the use of decorative lighting.
- Use LED or compact fluorescent bulbs.
- Use the fans only when they are needed.
- Unplug appliances not plugged into power strips (like Refrigerators, AC's, printers, faxes, and chargers etc.)
